

# OaaS for Federal: Operationalizing OSINT to Defend the Homeland

## **Challenges Today:**

*You cannot anticipate WMD Attacks; very little visibility into global digital clues indicating attack preparation*

*Battlefield operators do not have effective situational awareness of complex local environments and relationships.*

## **Mission Impacting Outcomes:**

*Identify malicious WMD labs in CONUS and OCONUS.*

*Track WMD related subjects with pattern-of-life analysis—identify associations, suppliers, leaders, funding sources.*

*DISRUPT a WMD attack before it occurs*

*Operators get ALERTS when weapons are detected in photos or video streams—force protection.*

## **Solution:**

*You can leverage OaaS today creating timely, relevant, shareable and actionable information. You can identify WMD actors, malicious research, track WMD related subject or material movements, alert on capability developments and sentiment changes.*

*You can identify potential friendlies and adversaries in advance with social media battlefield analytics. Identify subjects with suspicious relationships. Alert on movement of tactical operators for force protection. Identify insider threats traveling to suspect locations.*

## **Current Operational Deployments:**

*OaaS service components are in use across DoD, IC, and in commercial environments for mission planning and battlefield force protection.*

# OaaS Use Case Examples

- ▶ *Identify and track Weapons of Mass Destruction activity*
- ▶ *Domestic and International Terror Threats*
- ▶ *Strategic & Tactical Operational Planning*
- ▶ *Force Protection – CONUS and OCONUS*
- ▶ *Domestic & Global Contagious Disease Tracking*
- ▶ *Immigrant/Human trafficking*
- ▶ *Suspicious Material & Shipments Tracking*
- ▶ *Sensitive Project and Scientific Research Protection*
- ▶ *Executive, VIP, and Employee Protection*
- ▶ *Foreign owned or influenced, fraudulent material in supply chain, supply chain reliability risks*
- ▶ *Identify possible nation-state espionage in supply chains*
- ▶ *Tip and Que for active shooter, human trafficking, gang activity, drug trade*
- ▶ *Early identification of cyber bullying and potential active shooter at schools – identify at-risk children early*
- ▶ *Sentiment tracking in an area of interest or an organization*
